**Create an entirely new relaxation area with our latest addition — the “Cori” chair.**

Cori completes the interior composition whether at the dining table in the kitchen, next to a bookshelf in the living room, or in the bedroom to create a flawless cozy atmosphere. Additionally, this chair fits perfectly into the design of commercial spaces.

The ergonomics of upholstered furniture inspired the creation of the ideal model: a comfortable seat height and a wide, slanted backrest. Its soft contours provide a cozy seating experience, while the side panels gently embrace the body, promoting complete relaxation and allowing you to immerse yourself in your own thoughts.

Particular attention should be given to the wooden legs, the color of which — along with the upholstery — can be chosen to suit your taste. Made from solid beech and set at an angle, they provide additional durability and support to the chair's structure under load.
