Side View

"Koti" is not just beautiful — it's practical too. The banquette is very comfortable and easy to move. It can serve as extra seating in the living room or kitchen. In the hallway, it's convenient for keeping a bag or slipping into your favorite slippers.

"Koti" gracefully complements the bedroom, providing incredible relaxation after a long day and functioning as a footrest near the sofa. It's also often chosen for a vanity — allowing you to apply makeup in complete comfort.

The rounded silhouette combines softness with perfect proportions. Its refined look is expressed through tactile materials and subtle details. Thanks to its compact size, "Koti" doesn't take up much space, yet its surface can still hold small everyday items, much like a small, mobile table.

The leg height is 16 cm. Several shapes are available, so you're sure to find a version that fits your space perfectly.

The soft seat is constructed from **a wooden frame, chipboard, and polyurethane foam**. The rounded metal legs give the "Koti" banquette an elegant and contemporary look. It can support up to 100 kg. Despite its sturdy construction, it doesn't overwhelm the interior with unnecessary decorative elements. The metal finish, paired with any fabric, brings elegance and refined style to your room.
