

MALI S BED

FRANKOF

Soft, voluminous forms, smooth lines, and distinctive stitching across the entire surface make this bed a true focal point of the bedroom.

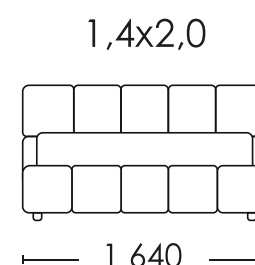

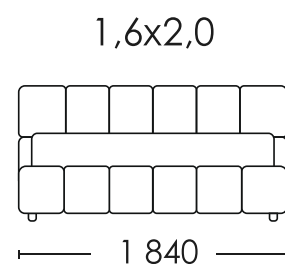

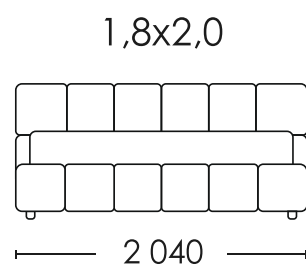

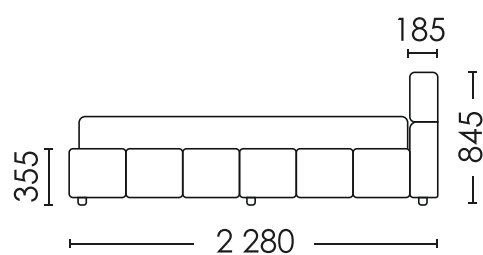

Mali S – a new shape of a beloved design

MALI S BED

In addition to its striking appearance, the bed retains its practicality. Mali S is equipped with a reliable lifting mechanism and a spacious storage compartment. Bedding, seasonal textiles, and other essentials are always within easy reach without taking up extra space in the room.

For configurations without a lifting mechanism, the bed features a chipboard base with ventilation openings to ensure proper air circulation.

The Mali S model has become more compact while preserving its recognizable charm, soft contours, and cozy feel. Special attention has been paid to personalization: you can choose from over 1,000 upholstery fabrics, allowing you to create a bed that perfectly complements your interior.

Smaller dimensions – greater freedom. More living space, a lighter and airier interior, and the same design that captures hearts at first sight.
