An exclusive new release from the FRANKOF upholstered furniture factory — the “Monte” bed — is a work of art in interior design, combining aesthetic beauty with profound meaning.

Based on the concept of Chinese wisdom, this model embodies the principles of harmony and energetic balance, featuring uniquely rounded shapes of the headboard and legs.

The frame is made from eco-friendly materials, ensuring not only sleep comfort but also structural reliability.

The bed is available in a variety of colors and upholstery textures: vibrant fusion, subtle minimalism, or light functionalism — choose from thousands of samples to match your taste, as the “Monte” bed is both a perfect solution for modern-style interiors and a long-term investment in your personal comfort.
