
PALERMO
SOFA
FRANKOF

The art of relaxation begins with the perfect form, designed around the natural human desire to unwind.
This philosophy inspired us to create the Palermo sofa.

There is no need to search for the ideal configuration – it has already been thoughtfully expressed in every proportion.

PALERMO SOFA

“PALERMO” IS A CORNER SOFA ELEVATED ON TALL METAL LEGS. PARTICULAR ATTENTION HAS BEEN PAID TO THE ERGONOMICS OF THE BACKREST.

Large, generously filled cushions are attached to a rigid support structure, angled to follow the body’s natural seated posture. The lower part of each cushion is secured with hook-and-loop fastening tape, allowing it’s position to be adjusted to individual preferences. The design of the backrest cushions also follows ergonomic principles. Their two horizontal sections provide gentle support for the back and neck, creating a naturally comfortable seating experience.

FRANKOF

PALERMO

We carefully select the filling materials for every element of our sofas. That is why the backrest cushions are filled with **siliconized polyester fiber balls**. Thanks to their light, airy structure, **this material offers exceptional softness while gently adapting to the body's position.** At the same time, the resilience of the fibers helps the cushions regain their volume after use, **maintaining their shape and attractive appearance over time.**

FRANKOF

The armrests are thoughtfully proportioned in both height and width to provide comfortable support for the arms. Their filling combines siliconized polyester batting and polyurethane foam (PU foam).

Together, these materials create a pleasant balance of resilience and softness to the touch.

This combination also helps prevent the filling from clumping, **preserving the armrests' shape and comfort throughout extended use.**

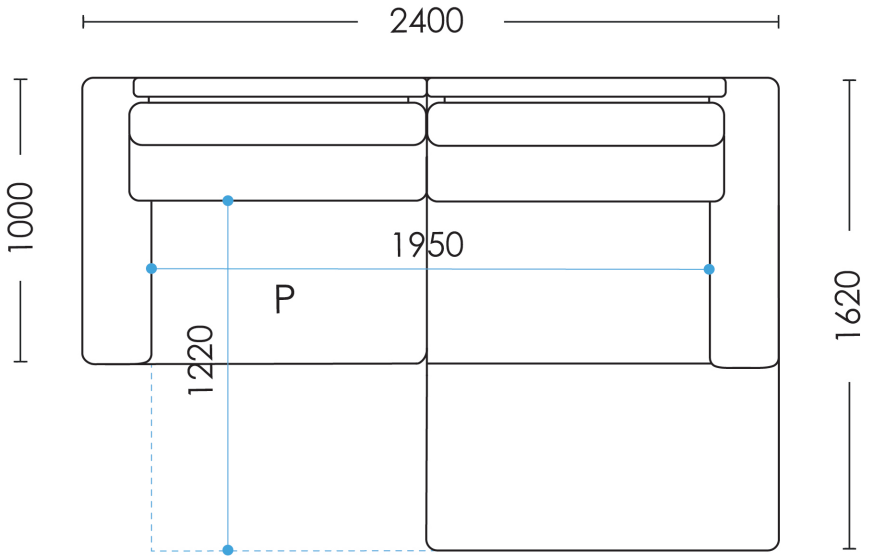

The Palermo sofa's armrests gain a distinctive character from the subtle draping of the upholstery. The fabric naturally follows their rounded contours, further emphasizing the softness of the design.

RECHLINING MECHANISM:
Palermo Corner: Dolphin (1950 x 1220)

FRANKOF

One of the sofa's most interesting engineering solutions is the combination of the Dolphin pull-out mechanism with tall metal legs (12 cm).

Traditionally, this transformation system requires a substantial base positioned close to the floor to conceal the pull-out structure. **With Palermo, however, we have moved beyond this conventional approach, preserving a refined silhouette with open space beneath the sofa.**

This solution combines a full-size sleeping surface with the aesthetics of contemporary furniture on elevated legs. The raised construction visually lightens the sofa's generous proportions **while also providing easier access to the space underneath for cleaning.**

A combination of softwood timber, E1-grade particleboard, and plywood (30%) creates a strong and reliable foundation. Sinuous springs and polyurethane foam (PU foam) in the seat provide an ideal balance of resilience and softness.

FRANKOF

Palermo is a complete, thoughtfully designed solution, where every detail has been considered – from seating ergonomics to it's contemporary, well-balanced aesthetics. **FRANKOF'S** extensive collection of upholstery fabrics makes it easy to personalize **Palermo** and seamlessly integrate it into an interior that reflects your individual style.

FRANKOF

Palermo is everything you need for the perfect relaxation experience, already thoughtfully designed for you.
