PAOLO

The PAOLO mattress is the perfect combination of modern materials and innovative technologies for those seeking maximum comfort during sleep. This non-spring mattress impresses with its balanced structure and unique properties, providing an exceptional resting experience. The knitted fabric with quilted texture, combined with Synteflex and Spunbond, adds durability and aesthetic appeal to the PAOLO mattress.

The outer cover, made of super-comfortable “Memory Sensitive” knitted fabric, provides a gentle touch against the body and perfectly adapts to every movement, creating a feeling of caring comfort. Its core features “Super Soft” and “Soft Elastic” foam on one side, and “Soft Elastic” foam with natural coconut coir on the other. This design offers delicate softness while maintaining the necessary support and body alignment, creating an ideal balance for different preferences.

The monolithic base with “Airproof Foam” adds durability to the mattress structure and provides excellent ventilation, helping to maintain freshness throughout its use. An additional layer of natural latex ensures excellent spinal support, increased resilience, and hypoallergenic properties.

For added convenience, the mattress is equipped with special side handles, allowing you to easily move and rotate it without any effort.
