FRANKOF

KLEO

A modern double-sided mattress designed for everyday comfort and reliable body support.

At the core of the mattress is a combination of hypoallergenic elastic polyurethane foam and latex-like PU foam layers that adapt to the body contours, evenly distribute pressure, and help maintain the correct spinal alignment during sleep.

The Kleo cover is made of high-tech volumetric "Stretch Soft" fabric. The fabric effectively absorbs and wicks away moisture, maintains a comfortable body temperature during sleep, and provides pleasant tactile sensations. It is also what creates the beautiful deep quilting pattern (diamond stitching).

The padding polyester and PU foam layers within the cover act as a light cushioning layer above the main mattress fillings.

FRANKOF

KLEO

Double-sided mattress with deep quilting on both sides. The border features an embroidered element placed at the center of the mattress width. The sewn-in label is attached along the length of the mattress, 20 cm from the corner on the left side of the embroidery. The cover is finished with white piping and is non-removable. Mattress height: 210 mm.

LAURO

The Lauro mattress is a modern springless model designed for comfortable and healthy sleep.

The construction is based on a monolithic polyurethane foam block that provides optimal body support, evenly distributes pressure, and helps maintain the correct spinal alignment during rest.

The model is double-sided, allowing both sides to be used and helping extend the lifespan of the mattress.

The cover is made of high-tech volumetric “Stretch Soft” fabric that effectively absorbs and releases moisture, maintains an optimal sleeping microclimate, and provides pleasant tactile sensations. The cover also includes layers of padding polyester and PU foam, which enhance the softness and comfort of the model.

RENATO

A springless mattress combining both firm and soft layers for balanced comfort and support.

At the core of Renato is an elastic polyurethane foam layer that evenly distributes pressure and helps maintain the body in the correct anatomical position.

Additional layers of thermal felt and coconut coir enhance the orthopedic properties of the mattress, providing optimal firmness and increased resistance to deformation.

The cover includes layers of padding polyester and PU foam to enhance softness and comfort during use. Thanks to the volumetric "Stretch Soft" fabric, the Renato cover provides a pleasant feel against the skin, effectively absorbs and releases moisture, and helps maintain comfort throughout rest.

CORRADO

Corrado is a springless mattress created for those who appreciate soft comfort during sleep.

The mattress is built with layers of PU foam with different properties, viscoelastic “Memory Foam,” and the innovative HIGHFOAM BIO™ material, all of which precisely adapt to the body contours and create a maximum orthopedic effect.

The innovative “Stretch Soft” fabric used in the Corrado cover provides freshness and comfort throughout the night by effectively absorbing and releasing moisture while maintaining an optimal sleeping temperature. The cover also includes layers of padding polyester and PU foam that add softness and volume, while creating the distinctive deep diamond quilting pattern.

FRANKOF

MASSIMO

MASSIMO is a unique orthopedic mattress designed for exceptional durability and support.

At the core of Massimo is a high-density support layer complemented on both sides by comfort layers made of HIGHFOAM BIO™ PU foam.

The mattress is thoughtfully engineered down to the smallest detail: it supports up to 160 kg per sleeping place, guaranteeing outstanding support and long-lasting durability even under intensive everyday use.

The Massimo cover is made from volumetric “Stretch Soft” fabric, distinguished by its pleasant texture and ability to absorb and release moisture while maintaining comfortable sleeping conditions throughout the year. It is also what creates the signature deep diamond quilting pattern. The layers of padding polyester and PU foam within the cover work together as a light cushioning layer.

Thanks to the carefully balanced combination of materials, the mattress provides proper body support, evenly distributes weight, and promotes healthy, deep sleep every day.

FRANKOF

MASSIMO LITE

A double-sided mattress that combines balanced support and comfort for everyday use.

The mattress is built around a central high-density foam core, complemented on both sides with comfort layers that soften the surface and create a pleasant resting experience.

Both sides of the model are designed for use, which helps extend the mattress lifespan and allows you to periodically alternate the sleeping side to maintain long-lasting comfort.

The cover is made of high-quality volumetric “Stretch Soft” fabric with multilayer filling, including padding polyester and PU foam, which add softness, volume, and create the distinctive deep diamond quilting pattern. The cover helps maintain a comfortable body temperature, effectively absorbs and releases moisture, and provides softness in every touch.

FRANKOF

MASSIMO LITE

Double-sided mattress with deep quilting on both sides using 100 g/m² sintepon. The border features an embroidered element positioned at the center of the mattress width.

The sewn-in label is attached along the length of the mattress, 20 cm from the corner on the left side of the embroidery.

The cover is finished with white piping and is non-removable.

MASSIMO SOFT

Massimo Soft is designed for those who seek максимально delicate comfort.

This is a double-sided mattress with a thoughtfully engineered construction that combines soft upper layers with a reliable supportive base.

The internal filling is based on a combination of several polyurethane foam layers with different densities. The soft outer layers provide gentle body contact, reducing pressure in the shoulder and hip zones, while the central layer ensures stability and proper spinal alignment.

The Massimo Soft cover is made from modern “Stretch Soft” fabric, which combines a gentle touch, good breathability, moisture absorption and release, and the ability to maintain a comfortable temperature balance during sleep.

This fabric also allows for deep quilting on both sides of the mattress, adding extra comfort and creating a pleasant surface texture. The layers of padding polyester and PU foam in the cover enhance softness and cushioning.

FRANKOF

MASSIMO SOFT

Double-sided mattress with deep quilting on both sides, using 100 g/m² sintepon (polyester fiberfill). The border features an embroidered element positioned at the center of the mattress width.

The sewn-in label is attached along the length of the mattress, 20 cm from the corner on the left side of the embroidery.

The cover is finished with white piping and is non-removable.

Mattress height: 210 mm.
